BST-SPSS series Solar Generator 300W/500W/1KW/1.5KW																																																																																																																																																																																																							
Features : <ul style="list-style-type: none"> • DSP Intelligent control chipset. • 3 times peak power, excellent loading capability. • AC prior/ECO mode/Battery prior selectable(optional). • Combine inverter/solar controller/battery all in one. • Adding fault code to monitor real-time work situations. • Continuous stable pure sine wave output with inbuilt AVR stabilizer. • LCD display. • Inbuilt automatic AC charger and AC mains switcher, switch time ≤ 4ms. • With UPS function. • Inbuilt LIFEPO4 battery . 																																																																																																																																																																																																							
																																																																																																																																																																																																							
Model BST-SPSS	30112-20 (PWM)	50112-30 (PWM)	10224-40 (PWM)	15224-50 (PWM)																																																																																																																																																																																																			
Built-in LIFEPO4 Battery Capacity	1*48AH(614.4WH) battery	1*78AH(998.4WH) battery	2*78AH(1996.8WH) battery	2*120AH(3072WH) battery																																																																																																																																																																																																			
Description	300W 12V Low frequency pure sine wave Inverter +12V 30A PWM Solar controller +45Hz~60Hz(50Hz/60Hz automatic recognition)	500W 12V Low frequency pure sine wave Inverter +12V 30A PWM Solar controller +45Hz~60Hz(50Hz/60Hz automatic recognition)	1KW 24V Low frequency pure sine wave Inverter +12V 30A PWM Solar controller +45Hz~60Hz(50Hz/60Hz automatic recognition)	1.5KW 24V Low frequency pure sine wave Inverter +12V 30A PWM Solar controller +45Hz~60Hz(50Hz/60Hz automatic recognition)

Capacity	Rated power	300W	500W	1KW																																																																																																																																																																																																			
	Peak power	900W	1.5KW	3KW																																																																																																																																																																																																			
Input	Standard battery voltage	12VDC	12VDC	24VDC																																																																																																																																																																																																			
	AC input voltage range	73~138VAC(110VAC) / 145~275VAC(220VAC)																																																																																																																																																																																																					
	AC input frequency range	45Hz~60Hz(50Hz/60Hz automatic recognition)																																																																																																																																																																																																					
Output	Conversion efficiency	≥90%(Battery mode); ≥99%(AC mode)																																																																																																																																																																																																					
	Output voltage	110VAC±2% / 220VAC±2% (Battery mode); 110VAC±10% / 220VAC±10% (AC mode)																																																																																																																																																																																																					
	Output frequency	50/60Hz±1%(Battery mode); Tracking Automatically(AC mode)																																																																																																																																																																																																					
	Output waveform	Pure Sine Wave																																																																																																																																																																																																					
	THD	≤3%																																																																																																																																																																																																					
	DC Output port	USB outputs (<4>) , 12VDC outputs (<4>)																																																																																																																																																																																																					
AC charger	AC charging current	max 20A																																																																																																																																																																																																					
	AC charging method	Three-stage(constant current, constant voltage, floating charge)																																																																																																																																																																																																					
PWM Solar charger	Charging mode	SMART controller																																																																																																																																																																																																					
	Max PV input voltage(at 25°C)	50V																																																																																																																																																																																																					
	PV input voltage range	15~44V	15~44V	30~44V																																																																																																																																																																																																			
	Charge & discharge current	20A	30A	40A																																																																																																																																																																																																			
	Max PV input power	280W	420W	1120W																																																																																																																																																																																																			
Solar panel	Solar panel standard	1*160W/18V	1*275W/16.5V	2*275W/30V																																																																																																																																																																																																			
Inbuilt battery	Capacity	1*12.8V48AH	1*12.8V78AH	2*12.8V120AH																																																																																																																																																																																																			
	Battery size(LxWxH)/pcs	1*(160*145*165mm)	1*(247*165*157mm)	2* (352*165*299mm)																																																																																																																																																																																																			
Other	Transfer time	≤4ms																																																																																																																																																																																																					
	Protection	with over-voltage, low-voltage, overload, short circuit, high temperature protections																																																																																																																																																																																																					
	Display	LCD																																																																																																																																																																																																					
	Cooling way	Cooling fan in intelligent control																																																																																																																																																																																																					
	Communication	RS232/R5485(Optional)																																																																																																																																																																																																					
Working mode(selectable)	d1	AC priority mode																																																																																																																																																																																																					
	d2(optional)	ECO priority mode																																																																																																																																																																																																					
	d3(optional)	Solar priority mode																																																																																																																																																																																																					
Work environment	Operating temperature	-20°C~55°C																																																																																																																																																																																																					
	Storage temperature	-15°C~60°C																																																																																																																																																																																																					
	Elevation	2000m(More than derating)																																																																																																																																																																																																					
	Humidity	0%~95%, No condensation																																																																																																																																																																																																					
Physical	Dimention, L x W x H(mm)	450*200*435mm	450*200*435mm	520*220*585mm																																																																																																																																																																																																			
	Net weight(kg)(with battery)	18.7	25	39
